OLUWAGBENGA OSIKOMAYA

Oluwagbenga is a professional who demonstrates composure and professionalism in specified roles. I am a detail-oriented PHP developer with a strong ability to create innovative, user-centered web applications. With experience in designing scalable solutions, I focus on building systems that improve business efficiency and enhance user engagement. My skill set includes developing seamless user interfaces, robust back-end solutions, and efficient content management systems. I am dedicated to leveraging my expertise to help organizations streamline operations, increase productivity, and deliver exceptional user experiences.

Project(s)

Christian Aid Organisation | NGOS

● *Developed a comprehensive web application Christian aid organisation, enabling donors to create accounts, make donations, and manage their profile details.*

● *Admins can easily locate donor details via a custom dashboard, while donors also have access their data.*

● *Additionally ,the platform features a question and feedback form on the landing page, allowing donors to interact with the organisation, with admins receiving notifications and responses via email.*

● *The application includes a dynamic blog management system, allowing admins to publish, delete, and manage blog content.*
